

What is **Frozen Custard?**

Custard is an old-fashioned ice cream treat created in 1919 on Coney Island, New York. It is made with all natural ingredients with no preservatives or artificial ingredients. **Our custard is made fresh throughout the day.**

Our custard is served at approximately 26 degrees, compared to regular ice cream at about 10 degrees. This allows your taste buds to get a “true taste,” unlike ice cream served at a lower temperature that tends to “numb” or freeze your taste buds while eating. Custard has very little air whipped in, making it denser and smoother than ice cream. Custard, by definition, must have 10% butterfat and 1.4% egg.

We're confident that after your first visit to Bop's Frozen Custard, you will agree that there is nothing that compares to our excellent service, taste, freshness, and quality!

*We are committed to serving the best
to the best: our customers!*

Need a great **Fundraising Event?**

We can help your school, church,
or nonprofit group raise money!
